## 2. Admin Dash Board

The screen below shows features for administrators. These are user managements, property management, messages and feedback, locations: states and cities.

We have various statistics and since this is not complete, expect more features to be added once milestone two is complete.

### 3. Admin Add other Admins

Only Administrators can add and promote other users to admin level for security reasons. They can be registered on the form below.

The screenshot shows a web browser window with the URL `cardanopropertysolutions.co/admin/register.php`. The browser's address bar and tabs are visible at the top. The page has a dark green header with a breadcrumb trail: `Home > Admin Register`. The main content area contains a registration form with the following fields: 

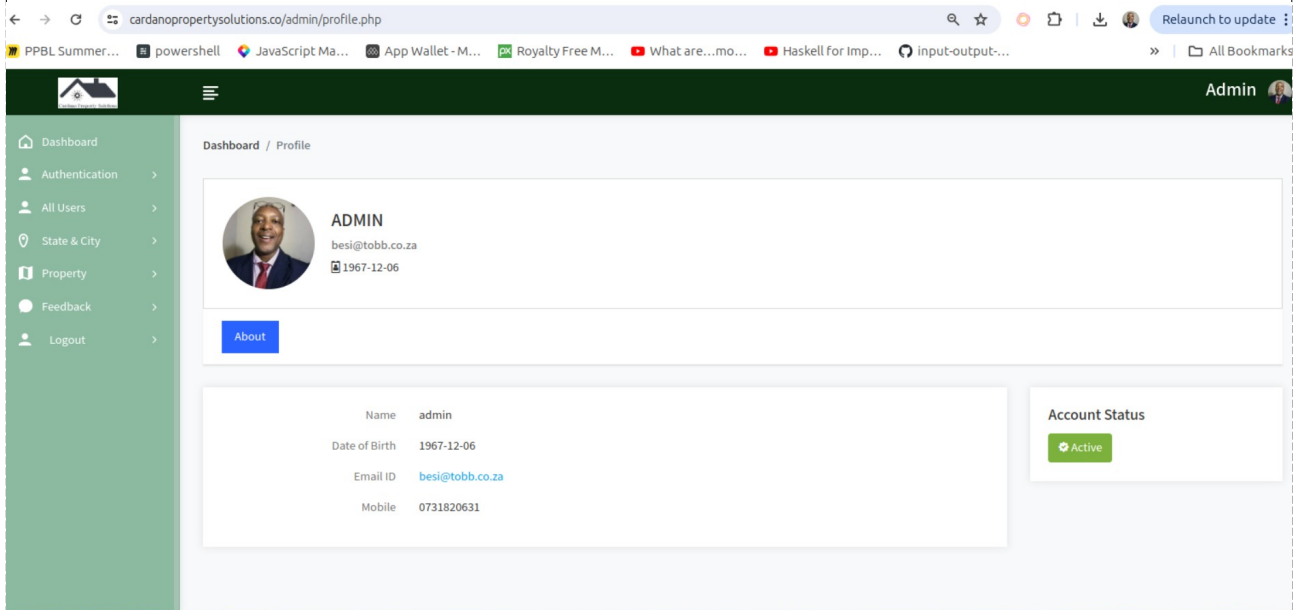

- Name
- Email
- Password
- mm/dd/yyyy (date field with a calendar icon)
- Phone

Below the form is a green `Register` button. A link `Already have an account? Login` is positioned below the button. The footer is dark green and contains the Cardano Property Solutions logo, a `Menu` section with a link to `About Us`, and a `Contact Us` section with the text `Cardano Property Solutions`. The footer also includes a description: `Cardano Property Solutions is a platform for prototyping tokenization and fractionalization using`.

## 5. Admin Manage States

This shows the management of states. They can be added and edited and even deleted.

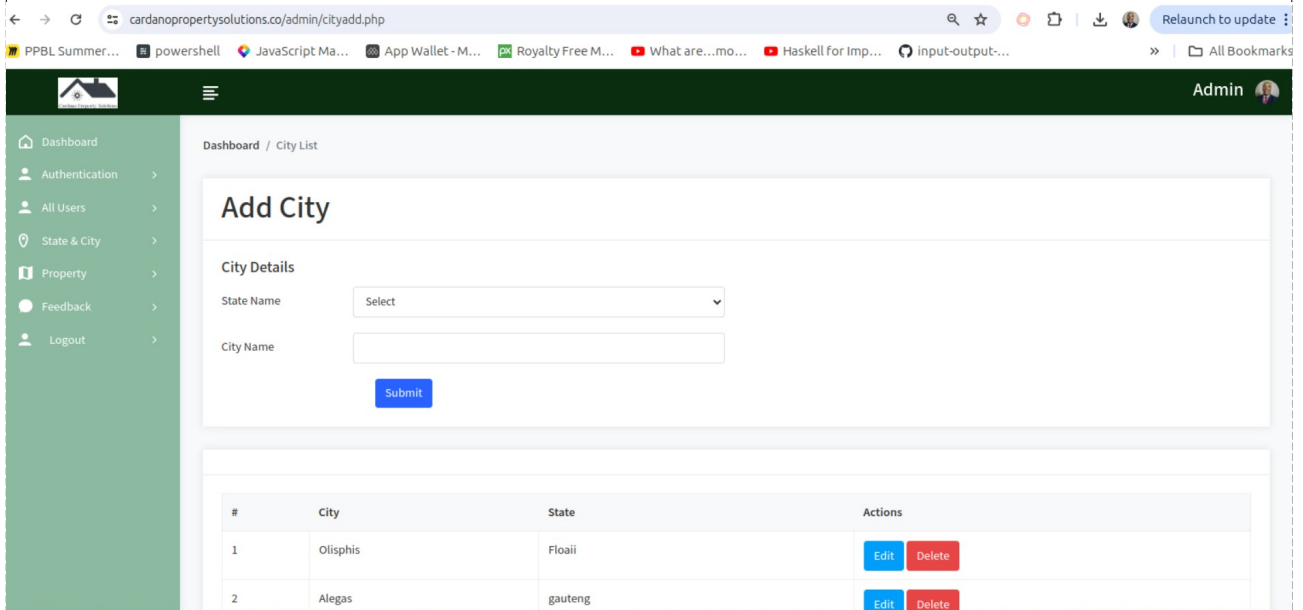

The screenshot displays a web application interface for managing states. The browser address bar shows the URL `cardanopropertysolutions.co/admin/stateadd.php`. The page features a dark green header with a logo, a menu icon, and the user name "Admin". A left sidebar contains a navigation menu with items: Dashboard, Authentication, All Users, State & City, Property, Feedback, and Logout. The main content area is titled "Dashboard / Add State" and is divided into two sections. The "State Details" section includes a text input field for "State Name" and a blue "Submit" button. The "State List" section contains a table with three columns: "#", "State", and "Actions". The table lists three states: "gauteng", "Floaii", and "Virconsin", each with "Edit" and "Delete" action buttons.

#	State	Actions

## 9. Admin Edit Pages : About Page

More features to come include adding pages as per need. Real Estate applications are very complex and grow with usage. The ability to add creation of dynamic content is very important.

Up to now the Cardano Property Solutions prototype is a fully working and hosted web applications with a frontend and backend and database.

Coming features with milestone two include purchases using ADA and the resultant reports. More weight will be on solving industry property problems using Cardano Smart Contract tools.
